

## NATIONWIDE BIOMETRIC SCREENING SERVICES

# The Labcorp Difference

### Superior Participant Experience

#### High Quality Staff

Labcorp screening staff are not contractors. They are carefully vetted by our Talent Acquisition team and receive extensive training. On-site supervisors monitor screenings to ensure accuracy, efficiency and adherence to Labcorp and industry quality standards.

#### Appointment Scheduling

Every client receives a branded, customizable online appointment scheduler. Calendar syncing and text message reminders are standard, and a single sign-on option makes the participant experience seamless. Telephonic scheduling is also available at no additional cost.

#### Health Education

Labcorp screenings include a brief results review, with in-depth health education as an optional service. Labcorp clinicians are Registered Dietitians who possess both clinical knowledge and extensive personal coaching experience.

#### Convenient Off-Site Options

Labcorp partnerships with multiple labs nationwide equate to approximately 3,000 off-site collection sites for spouses, remote employees, and employees unable to attend on-site screenings.

#### Client Success Team

A dedicated client success manager will attend to every detail of managing the process from start to finish, tailoring events to meet the needs of your population. This provides for a single point of contact throughout the duration of the program.

### Data and Reporting

#### WellConnect Plus™: Seamless Portal Experience

WellConnect Plus™ makes it easy for participants to schedule appointments and review their recent and historic results.

#### ScreenSMART: Data Collection and Event Management

Our popular tablet data collection application provides real-time data transmission, always encrypted and secure.

A health educator module with current and historical data. On-site satisfaction surveys with instant results. ScreenSMART also features a powerful peer-to-peer rating system.

#### LES Analytics: Dynamic Client Dashboard

Up-to-the-minute statistics on participation, engagement, and population risk— Explore year-over-year metrics. Drill down results by population segment or worksite location. Benchmark your company's data against other organizations similar in size and industry type.
