

# Flu Vaccinations

Offering flu vaccinations is one of the best ways to keep your employees healthy and productive during flu season. Just like our best-in-class biometric screening services, Labcorp manages all flu clinics internally.

## Standard Vaccine Offerings

Labcorp offers quadrivalent vaccines, which protect against four strains of flu and are the current industry standard.

For participants who are unable to attend an on-site flu clinic, the same standard quadrivalent vaccine is available through our convenient voucher program through Walgreens and CVS. Vouchers are redeemable at over 17,800 pharmacy locations nationwide.

## Superior Participant Experience

Scheduling appointments for on-site flu vaccinations is simple. Participants use WellConnect Plus™, a secure online HIPAA compliant portal, to book appointments, receive notifications and reminders, and download proof of vaccination.

At flu clinics, Labcorp staff manage event flow, obtain consent, and share standard information from the U.S. Centers for Disease Control and Prevention (CDC).

## Expert Client Success

Labcorp's flu clinics are managed by the same experienced Client Success Team who manages biometric screening programs. They use a specialized implementation process to help every event run smoothly. We provide a customizable communications toolkit with sample announcement emails, flyers, FAQs, and more. Our Client Success Team also supports the reporting and billing processes, and claims billing is available.

## Quality Staffing

Labcorp's flu nurses are W-2 employees, recruited and trained by our On-site Staffing team.

At larger flu events (or when vaccinations are offered alongside another service), a Registration Coordinator is always present to help with paperwork and manage event flow.

**Flu vaccinations are available as a standalone service, or they can be seamlessly integrated with biometric or COVID-19 screenings. Clients can also work directly with our team for billing through claims.**

At Labcorp, we are all about supporting the health and safety of your business and your people. We can help you build the resiliency of your business through our wellness and coaching programs, support you in fueling engagement through technology and on-site programming, enhance workforce safety through occupational testing and vaccination capabilities, and deliver the critical insights you need through deep analytical reporting.
