

Closing Gaps in Care for Healthier Populations and Improved Quality Performance

A Comprehensive Solution

Combining national reference lab quality with convenient at-home testing, Labcorp is uniquely equipped to manage care gap closure programs for your patients.

Configurable solutions for closing lab-based care gaps in conditions such as diabetes, colorectal cancer and chronic kidney disease

Full-service, end-to-end offering that supports patient outreach from testing to reporting

Capabilities designed to improve quality measures and financial performance

Ability to enhance health outcomes and reduce cost of care

Ready to help close gaps in care

Labcorp helps engage and motivate patients through proactive screenings including high-quality at-home testing kits. Labcorp gaps in care solutions improve compliance with recommended guideline-based testing and support increased quality performance.

Single source, end-to-end lab services

As one of the world's largest laboratories, Labcorp provides single-source, end-to-end gaps in care solutions that can be configured for the needs of health plans, employers and providers. From placing orders to patient outreach, kit shipment, lab analysis, and results reporting, our services are scalable to meet your specific needs and delivered at the same Labcorp standard of excellence as our diagnostic services.

Accessibility and convenience

Labcorp makes it easy for patients to participate in our programs with convenient access and customer support throughout the process. Patients are able to engage no matter where they are located, helping to close gaps quickly—improving compliance and financial performance.

Trusted partner

Working with multiple vendors will no longer be necessary. In addition to Labcorp's renowned comprehensive services, we combine a national footprint of nearly 2,000 patient service centers, an extensive library with thousands of diagnostic tests performed in our own labs, high quality results delivery and a commitment to patient satisfaction.

Configurable and Scalable Solutions

Payers

- Promotes compliance and improves quality performance
- Helps reduce costs and boost financial performance
- Refines patient experience and increases patient satisfaction

Providers

- Simplifies managing patient populations
- Maximizes quality performance
