

Labcorp workplace drug testing

A healthy, productive workforce begins with a drug-free workplace.

Labcorp offers a comprehensive menu of laboratory-based and rapid drug-free workplace testing options designed to meet the needs of most workplace testing programs. Our commitment to research, combined with leading-edge technology, allows us to offer an innovative test portfolio that reflects societal trends. To align with changing drug-free workplace needs, Labcorp offers non-regulated, lab-based and rapid drug test profiles that do not include marijuana.

Labcorp's testing options include:

Lab-based drug testing

- Regulated and non-regulated testing. Our full menu of standard urine testing panels ranges from five to 10 drugs, and specimen validity testing is available to detect adulterants or specimen substitution

Oral fluid drug testing

- Lab-based specimen collection in many of our more than 2,000 patient service centers in our nationwide network
- Rapid oral fluid testing with lab-based confirmation for a single fee

Rapid drug tests

- Point-of-collection testing to screen for drugs of abuse, urine specimen validity and saliva alcohol
- Several rapid test options are also available in many of Labcorp's patient service centers

Saliva alcohol screening

- Rapid saliva alcohol screening with a DOT-conforming product available at select Labcorp patient service centers
- Customers may choose to perform saliva alcohol screening at their own facility
- Non-negative DOT screens must be confirmed by breath alcohol at a third-party facility

Blood drug tests

- Since drugs are rapidly metabolized and eliminated from the body, blood drug testing may be appropriate when an individual is suspected of being actively under the influence of drugs or alcohol

Hair drug tests

- Offer up to a 90-day window for drug use detection with a convenient collection process
- Available in select patient service centers nationwide

Medical professional profiles

- Profiles to test for a variety of drugs commonly abused by medical professionals but not traditionally tested for by employers
- Flexible, cost-effective testing option for pre-employment, universal monitoring, random testing and post-rehabilitation compliance

The Labcorp difference

- Our labs are certified by the Substance Abuse and Mental Health Services Administration (SAMHSA) and the College of American Pathologists (CAP)
- First SAMHSA-certified laboratory system to offer a fully digital chain of custody form to simplify and improve the testing experience
- Nationwide laboratory network includes more than 2,000 patient service centers across the U.S. and additional coverage at third-party facilities through a national specimen collection network to ensure easy access to a network facility
- Specimen transportation through Labcorp's nationwide, company-owned courier network or through contracted couriers
- Dedicated support online or over the phone from our centralized Customer Contact Center
- Access to technical toxicology assistance experts
- Innovative technology solutions to make program implementation and delivery easy and secure
