Reducing supply chain risk  
to enable better business

OQ Compliance  
Management

## OO Compliance Management

Streamline OO records verification and management

- Veriforce manages employee and/or contractor OO programs, administering each client's covered task list(s) and maintaining a full audit trail of all qualifications
- Clients track covered task qualifications, identify upcoming qualification expirations, find authorized evaluators, and access field verification reports
- A single application to manage all aspects of qualification tracking and record-keeping, avoiding the risks inherent in pushing OO data into other systems and creating a simpler, more reliable solution

## OO Personnel Audits

Safeguard the quality of your OO program and demonstrate program effectiveness

- Desktop audits of qualified individuals verify they have not contributed to an incident/accident while performing covered tasks and ensure there is no reason to suspect they may no longer be qualified
- We also perform desktop and field audits of authorized evaluators to ensure evaluations are consistently conducted to satisfy requirements within the client OO programs
- Audit metrics can be used to help demonstrate OO program effectiveness

## OO Consulting

Ensure a defensible OO compliance program and keep on top of changing regulations

- Services are delivered by our in-house team of seasoned industry experts
- A select list of our consulting services includes:
  - OO Program Assessment
  - O&M Program Assessment
  - HQ D&A Program or Plan Assessments
  - OO Plan Development & Maintenance
  - CRM Program Assessment
  - Gap Analysis of OO Program-to-B31Q
  - Gap Analysis of Operator-to-B31Q Task List
  - Merger & Acquisition OO Gap Analysis
  - Merger & Acquisition O&M Gap Analysis

## OO Training

Reduce your training development effort and enable compliance with PHMSA requirements

- Covered Task eLearning Library – More than 165 courses that review the knowledge and skills needed to safely perform covered tasks, as well as how to recognize and react to AOCs
- Courses available on-demand, 24/7: Easy and cost-effective to provide covered task training to individuals in geographically-dispersed locations
- All course results automatically tracked: Eliminate time-consuming manual processes and share with enterprise HR or learning management systems via a systems integration
- Evaluator Training – Instructor-led: attendees learn skills to become a Veriforce-authorized evaluator
- CFR Pipeline Safety Training – Instructor-led: attendees learn core principles of CFR Title 49 Parts 191, 192, 195, and 199 and how to apply them to establish a defensible compliance program
